Business Loan / Cash Advance is based on 90% - 125% of a business average monthly credit card sales
Average \$20,000 a month in credit card sales: Business qualifies for \$18,000 - \$25,000 Advance

Repayment on business cash advances are simple and easy to manage with automated and flexible payments. Because advances are based on future credit card sales, your business pays back its advance based on sales volume – making repayment amounts suited to your business ability to make those payments. When credit card sales are slow, payment amounts are less, meaning we work within your business's cash flow situation. Thus if a business is on a 6 month payback plan and it takes 12 months the

A % of the business credit card sales is deducted daily towards the cash advance. Daily % typically between 15% - 30%.
